Agenda

- Deployment concepts
- Hands-on practice notes

Slides, hands-on practice, sample
application, schema setup files are
at kscope14.com & quovera.com

4:30 today: Intro to
ADF Faces layout

quovera

3

Application Deployment

- Copying and installing application files to a runtime environment
 - Development, test, QA, production
 - Occurs multiple times for an application
 - Bug fixes, enhancements, updates
 - Files are packaged, copied to the server
 - The server then unpackages the files
- You may be responsible
- Someone else may be responsible
 - You need to provide the files to deploy
 - Testing those files beforehand is useful

quovera

4

Preparation for Deployment

- Development and testing complete
- Required libraries and supporting files are identified
- Application server is available
 - Has an appropriate web container (JVM) process
 - For example, WebLogic Server
 - You know the server administration password
 - Or you know someone who knows

Deployment Objectives

- Files must be archived into specially formatted Java EE JAR files
- EAR: enterprise application archive
 - The main deployment file
 - Contains one or more WAR files
 - Configuration files
- WAR: web application archive
 - Contains all application files
 - Model, ViewController
- ADF Library JARs
 - Store common code
 - Model for example

Not part of the practice

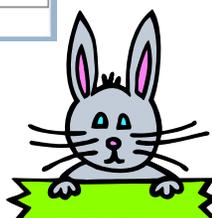

Sample EAR File

Path	Date	Size	Compressed
META-INF/HR_DB-jdbc.xml	6/20/14 6:14 PM	1.00 KB	1.00 KB
META-INF/application.xml	6/20/14 6:14 PM	477	477
META-INF/cwallet.sso	6/17/14 8:50 PM	3.18 KB	3.18 KB
META-INF/weblogic-application.xml	6/17/14 8:43 PM	1.58 KB	1.58 KB
adf/META-INF/adf-config.xml	6/17/14 8:50 PM	1.21 KB	1.21 KB
adf/META-INF/connections.xml	6/17/14 8:50 PM	987	987
adf/META-INF/wsm-assembly.xml	6/17/14 8:43 PM	127	127
hrdeploy.war	6/20/14 6:14 PM	792.99 KB	792.99 KB
lib/adf-loc.jar	6/20/14 6:14 PM	273	273

JDeveloper Archive Viewer

- One app (WAR) file in this case
- Several XML configuration files

Sample WAR File

Path	Date
WEB-INF/adfc-config.xml	6/17/14 8:43 PM
WEB-INF/classes/META-INF/adf-settings.xml	6/17/14 9:06 PM
WEB-INF/classes/META-INF/adfm.xml	6/20/14 6:14 PM
WEB-INF/classes/hr/model/EmpManagerFkAssoc.xml	6/17/14 9:06 PM
WEB-INF/classes/hr/model/EmpManagerFkLink.xml	6/17/14 9:06 PM
WEB-INF/classes/hr/model/Employees.xml	6/17/14 9:03 PM
WEB-INF/classes/hr/model/EmployeesView.xml	6/17/14 9:03 PM
WEB-INF/classes/hr/model/HRService.xml	6/17/14 9:06 PM
WEB-INF/classes/hr/model/Model.jpx	6/17/14 9:06 PM
WEB-INF/classes/hr/model/common/bc4j.xcfg	6/17/14 9:06 PM

- Can alternatively be deployed without an EAR
- Contains files inside WEB-INF (main runtime) folder

Agenda

- Deployment concepts
- Hands-on practice notes

Objectives

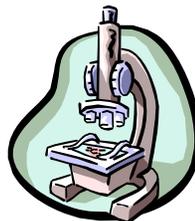

- ✓ Understand the contents of the WAR and EAR
- ✓ Set up a standalone WLS domain for testing
- ✓ Practice deployments to WLS using JDeveloper and/or WLS console

Uses Middleware 12c but 11g is similar

Standalone WebLogic

- Use it to experiment with a local deployment
 - After development, before server deployment
- One-time step: set up the WLS domain
 - WLS is part of Oracle Fusion Middleware
 - Installed with JDeveloper – can be run as a standalone server
- Access it in JDev and WLS console
- Run the application to test its functionality

WLS Configuration Wizard

Fusion Middleware Configuration Wizard - Page 1 of 3

Configuration

ORACLE FUSION MIDDLEWARE

Configuration

Configuration Progress

End Of Configuration

Administrative Account

Name: weblogic

Password: *****

Confirm Password: *****

Advanced Configuration

Domain Location: C:\Oracle\Middleware_1212\user_projects\domains\adf_domain

Administration Server Listen Address: All Local Addresses

Administration Server Listen Port: 7001

SSL Listen Port: 7002

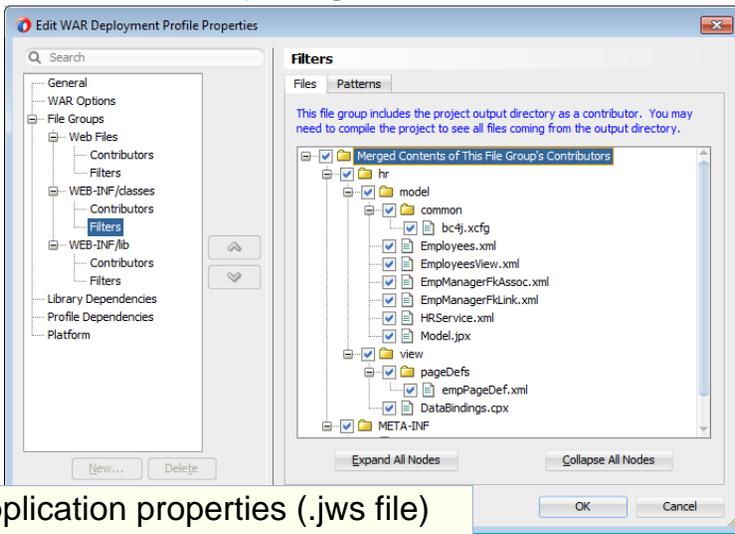

Coherence Listen Port:

Specifies the path and name of this domain.

Help < Back Next > Create Cancel

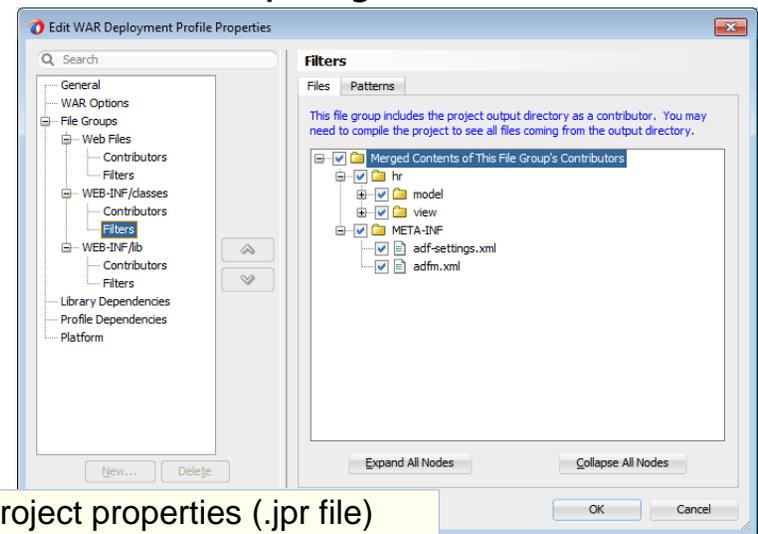

This is the "quick start" wizard

EAR Deployment Profile

- In application properties (.jws file)
- Default profile created with the Fusion Web App template

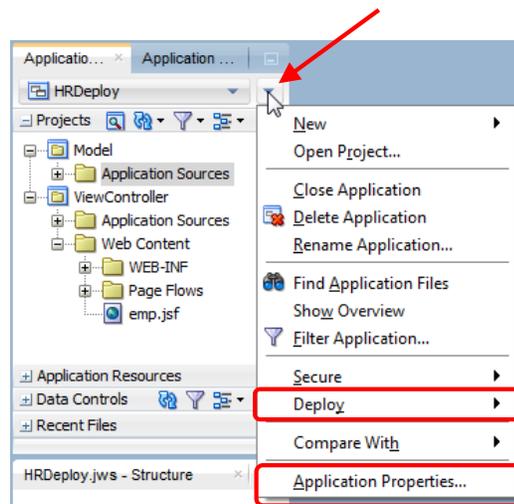

WAR Deployment Profile

- In project properties (.jpr file)
- Default also created with the Fusion Web App template

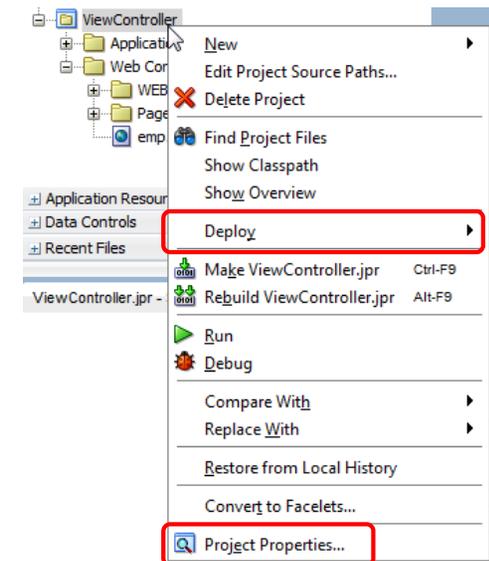

The Application Menu

- Deploy = EAR file deployment
- Application Properties = Edit the EAR deployment profile

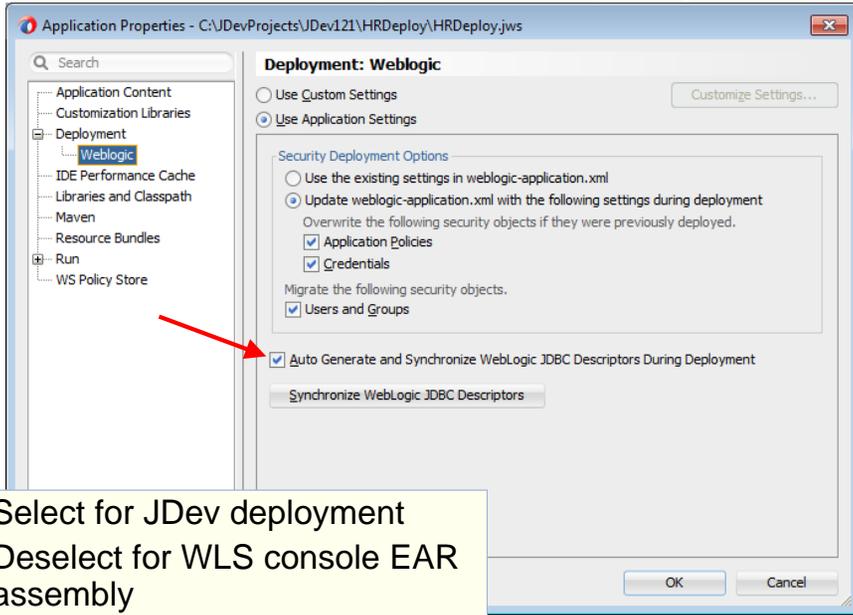

The Project Menu

- Deploy = WAR file deployment
 - **Note:** the EAR deployment will create the WAR as well
- Project Properties = Edit the WAR deployment profile

JDBC Descriptor Deployment

- Select for JDev deployment
- Deselect for WLS console EAR assembly

quovera

17

Data Source

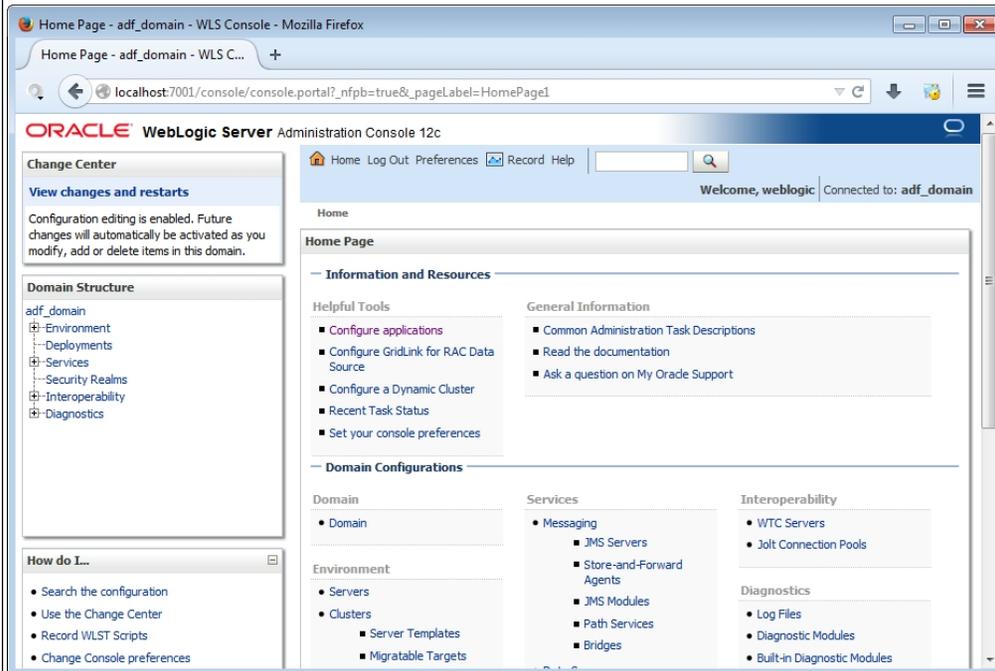

- Alternative to JDBC descriptor
- Named resource on the server
 - User ID, password, host, port, SID
- Application references the name
- The name is the same on development, test, QA, and production servers
 - Deployments use the same EAR file
- Credentials don't float around with the app files

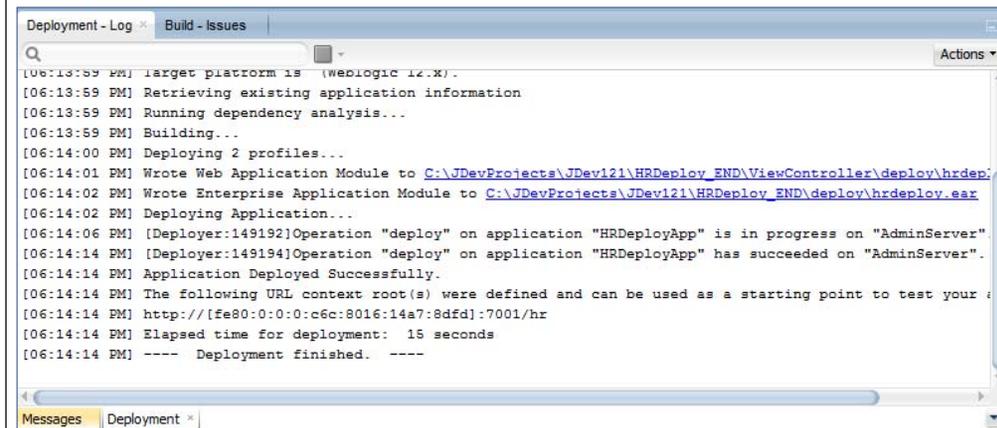

quovera

18

WLS Admin Console

Deployment Log Window

- Usually in the bottom of the JDeveloper IDE window
- Click the Deployment tab

quovera

20

We're Not Done Yet?

This is not the end.
It is not even the beginning
of the end.

But it is, perhaps,
the end of the beginning.

The Sheep in Wolf's Clothing

Not very long ago there were two sheep who put on wolf's clothing and went among the wolves as spies, to see what was going on. They arrived on a fete day, when all the wolves were singing in the taverns or dancing in the street. The first sheep said to his companion, "Wolves are just like us, for they gambol and frisk. Every day is fete day in Wolfland." He made some notes on a piece of paper (which a spy should never do) and he headed them "My Twenty-Four Hours in Wolfland," for he had decided not to be a spy any longer but to write a book on Wolfland and also some articles for the *Sheep's Home Companion*.

The Sheep in Wolf's Clothing

The other sheep guessed what he was planning to do, so he slipped away and began writing a book called "My Ten Hours in Wolfland." The first sheep suspected what was up when he found his friend had gone, so he wired a book to his publisher called "My Five Hours in Wolfland," and it was announced for publication first. The other sheep immediately sold his manuscript to a newspaper syndicate for serialization.

The Sheep in Wolf's Clothing

Both sheep gave the same message to their fellows: wolves were just like sheep, for they gambolled and frisked, and every day was a fete day in Wolfland. The citizens of Sheepland were convinced by all this, so they drew in their sentinels and they let down their barriers. When the wolves descended on them one night, howling and slaving, the sheep were as easy to kill as flies on a windowpane.
